LEGAL INFORMATION

Privacy Policy

This Privacy Policy explains how Kindred Asterling AI Coaching collects, uses, safeguards, and discloses personal information.

VERSION 1.2	**EFFECTIVE DATE** October 17, 2026
GOVERNING LAW Alberta PIPA, PIPEDA & Canadian Privacy Law	**SOLE PROPRIETOR** Landon Syroid d/b/a Kindred Asterling AI Coaching
STATUS Published	

1. Who We Are & How to Reach Our Privacy Officer

Kindred Asterling AI Coaching ("Kindred", "we", "us", or "our") is an Alberta sole proprietorship owned and operated by Landon Syroid in Edmonton, Alberta, Canada. Landon Syroid is our Privacy Officer and is responsible for how we handle personal information.

We handle personal information under the Alberta Personal Information Protection Act (PIPA, SA 2003, c P-6.5) and, where it applies, the federal Personal Information Protection and Electronic Documents Act (PIPEDA, SC 2000, c 5). This policy applies to the Kindred web app at kindred-asterling-ai-coaching.com and to our website at kindred-asterling-ai.xyz.

- Privacy Officer (privacy questions, access and deletion requests): Landon Syroid, kindredaicoach@gmail.com
- Customer and account support, billing and refunds: kindred_support@kindred-asterling-ai-coaching.com

- Mailing address: 202 - 10249 119 ST NW, Edmonton, AB T5K 2Y6, Canada

2. Personal Information We Collect

We collect the information you give us and a small amount of technical information needed to run the Service:

1. Account information: your email address, name, email verification status, and sign-in identifiers from our sign-in provider, Auth0. If you sign in with Google, Google shares your name, email address and profile picture with us.
2. Profile and onboarding information: your preferred name and, if you choose to give them, your birthday, a short bio, and what you share about your struggles, strengths and interests.
3. Wellness and coaching information: morning check-ins, evening reflections, mood scores, body scan notes, habits, medication names, doses, schedules and notes, personal goals, journal entries, and your conversations with the AI coach. Some of this is health information, which we treat as sensitive.
4. Voice recordings: if you use voice features, the audio you record is sent for transcription and the coach's reply may be turned into speech. We do not keep the audio after it is transcribed.
5. Reminder settings: the reminders you set up, your timezone, and, if you turn on text-message reminders, your mobile phone number. We keep a record of reminders sent.
6. Subscription and beta information: your plan (Yearly or Lifetime Access), payment references and transaction IDs from our payment processor, Helcim, and, if you joined the beta, your beta access record. We never see or store your full card number.
7. Usage and technical information: a daily count of chat messages (to apply the daily message limit), security events, and error logs. Your IP address is used briefly to limit abusive traffic; our application logs do not record your IP address or the content of your entries.

You choose what wellness information to enter. Most profile and wellness fields are optional, and you can edit or delete them at any time.

3. Why We Use Your Information

- To provide the coaching chat, check-ins, reflections, habit and medication tracking, and progress views you ask for.
- To personalize coaching replies using the parts of your history that relate to what you are talking about (see our AI Use Disclosure).
- To send the reminders you set up by email or text message.
- To manage your account, beta access and subscription, and to process payments and refunds.
- To keep the Service secure, prevent abuse, and fix problems.
- To understand how features are used so we can improve them (see Product Analytics in section 4).
- To meet our legal, tax and accounting obligations.

We do not sell your personal information, and we do not use it for advertising. We do not use your wellness information or conversations to train AI models. Under Anthropic's commercial terms, Anthropic does not use requests sent through its API to train its models.

4. Service Providers & Storage Outside Canada

We use the service providers below. Each receives only the information it needs for its task. Some are located outside Canada, mainly in the United States. Information stored or processed outside Canada is subject to the laws of that country and may be accessed by its courts, law enforcement and national security authorities.

- Hosting and database - DigitalOcean (Toronto, Ontario, Canada): runs the Kindred app and stores your account in a managed PostgreSQL database.
- AI coaching - Anthropic (United States): Claude models generate coaching replies. The message you send, recent conversation history and the related wellness information described in our AI Use Disclosure are sent to Anthropic for each reply. Anthropic's commercial API terms govern how long it keeps these requests.
- Sign-in - Auth0 by Okta (Canadian region): account sign-in and session security.
- Payments - Helcim (Calgary, Alberta, Canada): checkout, subscription billing and refunds.
- Email - Resend (United States): account emails and email reminders.
- Text messages - Twilio (United States): text-message reminders, only if you turn them on.

- Voice - ElevenLabs (United States): speech-to-text and text-to-speech, only when you use voice features.
- Website and network - Cloudflare (global network): DNS for the app domain, and hosting of our website at kindred-asterling-ai.xyz, including request logs for that website.
- Web fonts - Google Fonts (United States): pages load fonts from Google, which receives your IP address and browser details when a page loads.
- Product analytics - Amplitude (United States): our servers report actions such as "Morning Check-in Completed" or "Habit Logged" under a scrambled identifier, with no name, email or entry content. Where our coaching-chat analytics are switched on, Amplitude also receives the text of chat messages and coaching replies, with automated redaction of personal identifiers, and the names of the information the coach looked up (for example, medication status), linked to your account ID.

You can ask our Privacy Officer at kindredaicoach@gmail.com for written information about how we use service providers outside Canada, or any question about them.

5. Google Sign-In & Former Google Calendar Integration

- Google sign-in: if you sign in with Google, we receive only your basic profile (name, email address, profile picture). Our use of information received from Google APIs follows the Google API Services User Data Policy, including its Limited Use requirements. It is never sold, used for advertising, or used to train AI models.
- Calendar removed: Kindred no longer connects to Google Calendar. Connection tokens saved before the integration was removed can no longer be decrypted or used, and they are deleted.
- You can remove Kindred from the third-party connections in your Google Account at any time.

6. How Long We Keep Information

- Account, profile, wellness and coaching information: until you delete it or delete your account.
- Reminder delivery records and daily message counts: while your account is open.

- Database backups: kept by our hosting provider for no more than 35 days. Deleted information may remain in a backup until that backup expires; we do not restore deleted accounts from backups.
- Server and security logs: no more than 12 months.
- Payment and transaction records held by Helcim: as long as tax and accounting law requires, up to 7 years.

7. Your Rights: Access, Correction, Export & Deletion

You can:

- Download a copy of your data at any time with "Download my data" in the app, or ask us for access to the personal information we hold about you and how it has been used and disclosed.
- Correct your information in the app, or ask us to correct it.
- Delete your account in the app. This cancels any Yearly renewal, immediately deletes your account and everything stored with it from our live database, and removes your records at Auth0 and Amplitude, as described below.
- Withdraw consent to optional processing, such as text-message reminders or voice features, by turning them off in the app.

When you delete your account:
Billing stops first. We cancel any Yearly renewal with Helcim before anything is deleted, so you will not be charged again. If we cannot reach Helcim to cancel it, nothing is deleted and the app asks you to try again; you can also email kindred_support@kindred-asterling-ai-coaching.com.

Your sign-in record at Auth0 is deleted, and we send Amplitude a request to delete the analytics linked to you. If Auth0 or Amplitude cannot be reached, we retry automatically and otherwise complete the removal ourselves, within 30 days either way.

Deleting your account ends your access right away. It does not by itself refund a payment (see Refunds in our Terms), and Helcim keeps payment and transaction records as described in section 6.

To make a request, email our Privacy Officer at kindredaicoach@gmail.com. We will confirm your identity and respond within 30 days. If you are not satisfied with our response, you can complain to the Office of the Information and Privacy Commissioner of Alberta (oipc.ab.ca) or, where federal law applies, the Office of the Privacy Commissioner of Canada (priv.gc.ca).

8. Security & Breach Notification

We protect information with encryption in transit (HTTPS), a managed database that our hosting provider encrypts at rest, access to production data limited to the proprietor, and automated scanning of our software dependencies for known vulnerabilities. No system is perfectly secure.

If a loss of or unauthorized access to personal information creates a real risk of significant harm, we will notify the Information and Privacy Commissioner of Alberta without unreasonable delay, as section 34.1 of PIPA requires, and we will notify the people affected.

9. Age & Changes to This Policy

Kindred is only for adults aged 18 and older. We do not knowingly collect personal information from anyone under 18; if we learn we have, we delete it.

When we change this policy, we update the version and effective date at the top of this page. If a change materially affects how we use information we already hold, we will tell you by email or in the app before it takes effect.
